

Create a sustainability triangle on the environmental impact of cruise ships and bill 672

Economy (Ships: 10/10, 672: 1/10)

- + Creates a lot of jobs in the Tourism sector
- Investing in environmentally friendly vessels is really expensive
- Bill 672 causes large layoffs
- + Global profits estimated at 35 billion euros by 2027

Ecology (Ships: 1/10, Bill 672: 9/10)

- + Modern cruise ships with less emission are already in development
- Newer ships running on LNG are only expected to reduce emissions by 20-25%
- Contemporary cruise ships heavily impact the environment through emissions
- Continued expansion of the industry leads to rising emissions
- Emissions reaching the fjords contribute to micro-algae growth

Social (Ships: 6/10, Bill 672: 7/10)

- + Stable jobs for the Tourism sector
- Bill 672 discourages tourism
- + Bill 672 promotes the environmentalist initiative of Norway
- Health risks rise with air pollution
